## MY PROJECTS

### iTax Mobi

This is an android concept app that would provide all the functionality of the iTax website itself.

<https://play.google.com/store/apps/details?id=com.nganga.itaxmobi&hl=en/>

### Personal Website

My personal website with my blog on which I write various guides on solving technical issues. It is written with the flask framework in markdown then exported to HTML.

<https://github.com/anthonymiyoro/anthonymiyoro.github.io/>

### MVP

A fully featured landing page system complete with signup functionality with gmail integration built with python. All the system files can be found below.

<https://github.com/anthonymiyoro/mvp/>

### Matchmaker

An application that matches employees in a workplace to teams depending on their matching personalities and preferences. All code and documentation are hosted on github.

<https://github.com/anthonymiyoro/matchmaker/>

## REFEREES
