MY PROJECTS

iTax Mobi

This is an android concept app that would provide all the functionality of the iTax website itself.
https://play.google.com/store/apps/details?id=com.nganga.itaxmobi&hl=en/

Personal Website

My personal website with my blog on which I write various guides on solving technical issues. It is written with the flask framework in markdown then exported to HTML.
https://github.com/anthonymiyoro/anthonymiyoro.github.io/

MVP

A fully featured landing page system complete with signup functionality with gmail integration built with python. All the system files can be found below.
https://github.com/anthonymiyoro/mvp/

Matchmaker

An application that matches employees in a workplace to teams depending on their matching personalities an preferences. All code and documentation are hosted on github.
